

Extend Pharmacy Benefits to Furloughed Employees at Little or No Cost

Alternative PBM Benefit Programs Available During COVID-19 Crisis

Our Flex Card and Cash Card programs offer creative, easy-to-use, easy-to-market prescription programs to those employers, insurers, or TPAs that wish to offer a low-cost drug program to their members, especially at a time when reductions of staff are inevitable. While not insured programs, both programs provide members with easy to implement, affordable drug options.

With hundreds of active groups, these programs are often used as a supplemental prescription program by companies that do not provide benefits to part-time, temporary, or even some full-time employees. Both programs offer competitive discounts, the Flex Card more than the Cash Card, on all prescription drugs sold through retail and mail order pharmacies with free home delivery through ProCare PharmacyCare.

FLEX CARD PROGRAM

The Flex Card Program is a stable managed care program with a hard plastic prescription card that offers great value to you and your members.

Benefits include:

- Aggressive Managed Care pricing
- Prescriptions are 100% paid by member
- Consolidated and reported under one plan
- Low fee of \$3.00 per employee per month
- Easy to implement
- Free home delivery through ProCare PharmacyCare

CASH CARD PROGRAM

Link: <https://www.slashrx.com/bhealth>

Cash Card members always receive the lowest possible price for medication at the pharmacy, whether that is their insurance copay, the pharmacy price, or our BIS Health discounted rate. Benefits include:

- Managed Care pricing
- 100% paid by member, no monthly fee
- No profile or eligibility required
- Utilization reporting not available
- Easy to implement
- New ID card may be texted, mailed, or printed from website
- Free home delivery through ProCare PharmacyCare

Either of these cards will enable you to extend benefits for your furloughed, part-time, or seasonal employees.
